## PROJECTS

### Playlistr — [playlistr-io.herokuapp.com/](https://playlistr-io.herokuapp.com/)

- Used state to simulate a music player with React
- Manipulated user's music queue with Spotify API and MongoDB
- Stored room data using Express, Mongoose and MongoDB
- Built stateful track search dropdown with Spotify API and React

### Project Tracker — [trackitproject.herokuapp.com/](https://trackitproject.herokuapp.com/)

- Stored user project data with Express, MySQL and Sequelize
- Encrypted sensitive user login data with bcrypt.js
- Ensured accurate project data with specific API routes
- Improved app performance with Compression

### Directory — [hermanjohn2.github.io/employee-directory-react/#/](https://hermanjohn2.github.io/employee-directory-react/#/)

- Created sortable employee table using state in React
- Wrote filter and sort methods for React components in JavaScript
- Created stateful form with React and react-bootstrap

### Eat Da Burger — [radiant-savannah-28359.herokuapp.com/](https://radiant-savannah-28359.herokuapp.com/)

- Developed user interface (UI) using MVC design pattern
- Enhanced user experience (UX) with Handlebars.js
- Wrote API for data storage with Express, AJAX and MySQL

## EXPERIENCE

### Yogurtland, Atlanta, GA — *General Manager*

August 2011 - PRESENT

- Manage operations of three locations
- Interview, hire, train and oversee 30 employees
- Reduced labor percentages by updating procedures
- Wrote new policies to minimize staff turnover

## EDUCATION
